SOUDAL BUILDING THE FUTURE

SOUDAL - EXPERTS IN SEALANTS, ADHESIVES & PU FOAMS

Soudal is Europe's largest independent manufacturer of sealants, adhesives and PU foams for both professionals and private users. With more than 4,000 employees, a turnover of 1.34 billion euros and 29 production sites in 5 continents. This 100% Belgian family business, founded by Vic Swerts, has grown into a global player and expert in chemicals for construction and industrial applications. Extensive investments in R&D, a long-standing vision of innovation as well as adaptations to local market needs laid the foundation for its excellent performance. Soudal is accredited as best managed company and top employer.

MISSION

Soudal aims to become the world's largest independent manufacturer and service-oriented supplier of sealants, adhesives and PU foams for professional construction, retail and industry. Soudal operates in a safe, sustainable, high quality and profitable manner to perpetuate the continuity of the business, values the satisfaction of its employees and the respect of the local community.

"Our employees are our most important asset."

Vic Swerts

VISION

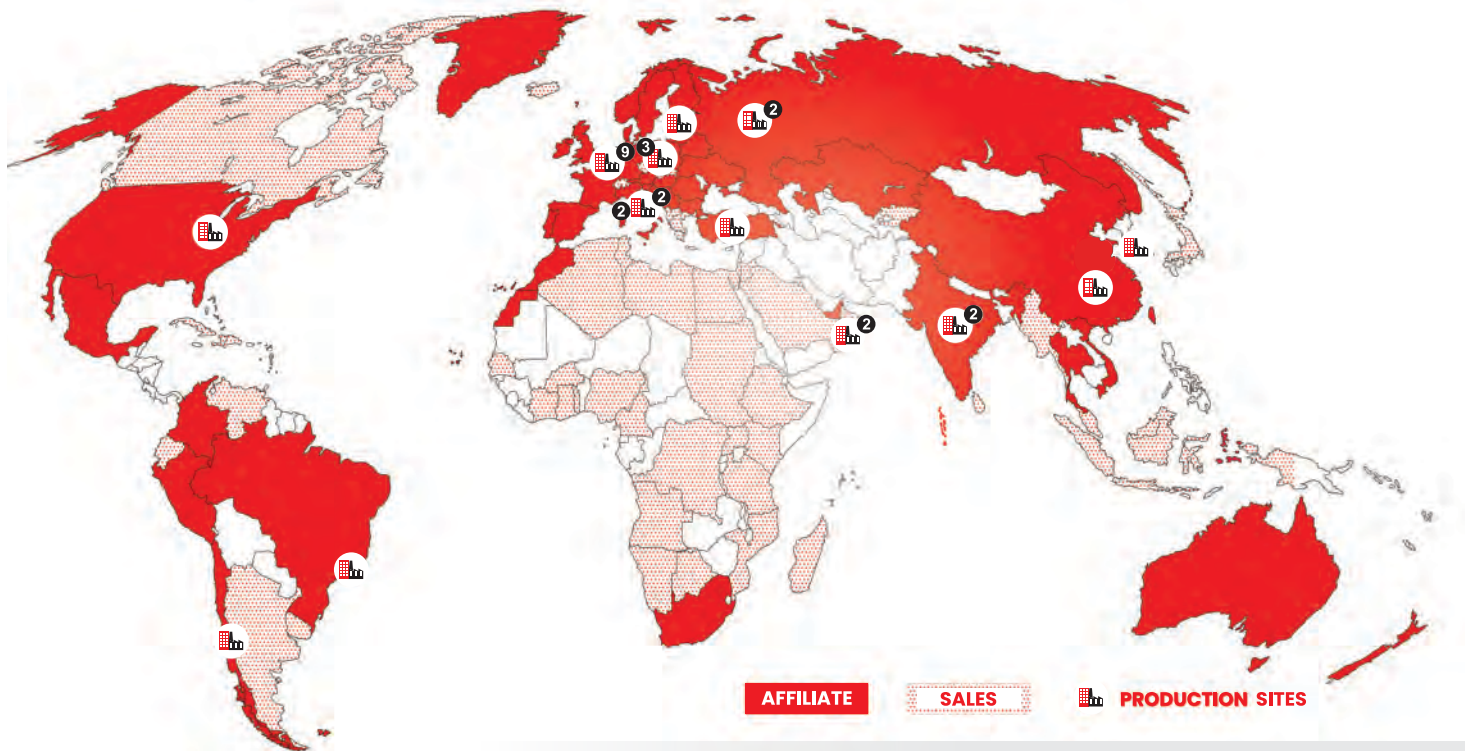

Soudal continues to find solutions to current and upcoming global challenges. Innovation and progress are the keywords of preference. We aim to be a pioneer for the professional and retail construction sector. We are fully committed to building a better future.

In its industry, Soudal aims to become and remain a leader by manufacturing and selling quality products in selected market segments, anywhere in the world. We continuously improve these products. Soudal aims to increase its rate of innovation and develop new areas of activity.

Vic Swerts, Chairman-Founder: "Our employees are our most important asset. Daring entrepreneurship involves the challenging process of bringing together a unique team of people. Employees, partners and customers are no hollow concepts. It's about people, about individuals who enable the entrepreneur to realise an ambition. You must therefore surround yourself with good, strong people who know and can do better than you."

OUR VALUES

Soudal is an international company that operates in 140 countries, but despite that dispersed geographical presence, all Soudal colleagues share a common goal. After all, all our employees are part of one company, one entity, one team. We share the same dream worldwide: continuing to **BUILD THE FUTURE** together.

We express and show this visually with our slogan **(YOU) BUILD THE FUTURE**. The red brackets show explicitly that you are included, that you are part of Soudal. Regardless of the area you work in, every colleague is an indispensable link in our great company. We are a multinational company, but within the company nobody is just a number. **"You matter!"**

(YOU)
BUILD THE FUTURE

THREE CORE VALUES

UNCOMPLICATED SINCERITY

Above all, we value integrity and respect. We always try to be honest with each other and all our stakeholders. We keep this uncomplicated by having short lines of communication, keeping procedures simple and working in a down-to-earth way.

AMBITIOUS BRAVERY

At Soudal, we keep trying until we win. We always want to learn and try new things to keep growing.

SHARED LOYALTY

We are 100% a family business, and everyone within Soudal belongs to that family. Together, we want to continue to strive for loyalty and a positive environment.

SUSTAINABILITY MANAGEMENT

OUR SUSTAINABILITY STRATEGY

Based on our materiality analysis, we develop Soudal's sustainability strategy, called 'Building the future together'. This is not just a slogan! It is a call to action, a shared commitment to shape a better future together, a sustainable future for generations to come.

BUILDING THE FUTURE TOGETHER

BUILDING THE FUTURE TOGETHER Three major ambitions form the basis. Each ambition in turn has three impact domains, which together encompass all our material topics:

Working on the climate-neutral society of tomorrow

With our building products, we make an important contribution to passive building and living, which will become the norm in the future. We also tackle our own greenhouse gas emissions and limit other emissions to the air, soil and water. At the same time, we close as many material cycles as possible: we limit the use of raw materials and packaging materials, reduce our residual flows and focus on recycling.

Providing the best workplace to our people

Our people are at the heart of our company. We want to offer them the best possible workplace, which is first and foremost safe, but also pleasant and motivating, with plenty of opportunities for personal growth. With our authentic and family-like corporate culture, we create a warm place for our employees and keep staff turnover low.

Growing better through responsible entrepreneurship

For us, economic growth is inextricably linked to ethical entrepreneurship and good governance. Careful entrepreneurship is also expressed in continuously innovating and making our products more sustainable, so that our growth is sustained.

GENERAL PURPOSE

The Original Acetoxy Silicone Sealant

General Purpose is a high-quality, elastic one-component acetoxy joint sealant based on silicones.

Applications:

- ✓ All usual horizontal building, connection, expansion and dilatation joints.
- ✓ Glazing and joint works.
- ✓ Elastic joints in cold store and container applications.
- ✓ Sealing in air condition systems, HVAC systems and automotive applications.
- ✓ Sealing of joints in prefabricated buildings, sealing between window, door frames and walls.

Properties:

Permanently Elastic

Low Shrinkage

Good Adhesion

UV Resistant

Available Color:

Translucent

White

Black

Packaging:

Cartridge 260ml
